- AA48109-6pk
- AA48111-6pk
- AA48108-2-6pk
- AA48110-2-6pk

### AA473 Oil Filter Drain Tool

For years aircraft technicians and owners have complained about the mess created when removing an oil filter for an oil change. Not only does it create a mess, the residual oil can be detrimental to accessories such as vacuum pumps.

To eliminate this problem Tempest is proud to introduce our AA473 oil filter drain tool.

#### Features & Benefits:

Patent pending design, made of very durable material. Punch design does not allow metal debris in oil filter can. Designed to work specifically with the Tempest filter—another great reason to convert to Tempest!

**We Stock Solutions. We Deliver Certainty.**
